EN7000 Induction Motor Datasheet (DOC-EM-7000)

Section 1

1 Ratings

Rated power 7.5 kW at 1450 rpm, 400 V 50 Hz, rated current 14.9 A.

Insulation class F, rise limited to class B (80 K) in continuous duty.

Service factor 1.15, starting current 6.5 times nominal.

Section 2

2 Efficiency

Efficiency 92.5 percent at 75 percent load and 91.8 percent at rated load. Power factor 0.86 at rated load. Efficiency values measured per IEC 60034 test method 2-1-A with a one percent measurement uncertainty.

Section 3

3 Bearings and lubrication

DE bearing 6208, NDE bearing 6210. Relubricate DE after 12000 running hours with 4 g of grease LGHP 2/18; NDE after 18000 hours with 6 g. Bearing temperature must stay below 95 degC in operation.
